

ACTIVATED CARBON DESSICANT & ODOUR REMOVING SACHET

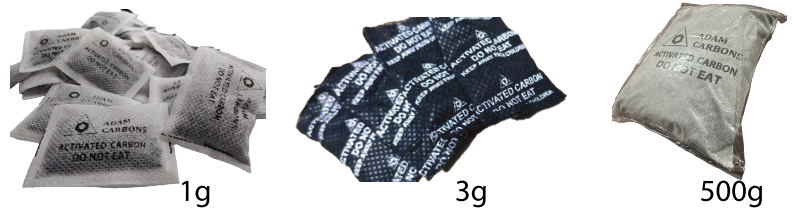

Adam Carbon Desiccant and Odour Removing sachet is an Eco – Friendly Desiccant and Odour Remover suitable for any and all applications which require removal of moisture and / or unwanted odours.

The core element of this product is High Quality Steam Processed Granulated Coconut Shell Activated Carbon.

The Superior Quality of Activated Carbon manufactured by Adam Carbons Limited is extremely efficient and effective in removing moisture and odour from its target environment whilst having anti - bacterial, anti - viral and anti - fungal properties.

The custom made High Quality Activated Carbon used in Adam Carbon Desiccant and Odour Removing Sachets has been specifically designed to maximize the surface area making absorption more efficient & effective.

Adam Carbon Desiccant and Odour Removing Sachets are used world wide for its effective removal and prevention of moisture in a wide range of industrial and commercial products & for its effective removal of odour particles including but not limited to cigarette smoke, food – based aromas, pungent odours and most toxic chemical fumes from product packaging, shipping containers and other environments.
