

AC VIRGIN GRANULAR IMPREGNATED SERIES

DATA SHEET

Silver Impregnated Acid Washed Activated Carbon has specific compounds of silver added to it in order to remove harmful bacteria from its target environment. This bacteriostatic Activated Carbon prevents and / or eliminates the growth of bacteria. This is of particular interest in terms of sterile water filtration systems.

Material	100% Sri Lankan Coconut Shell
Physical appearance	Black, Granular
Particle size - US Mesh	4 x 8 / 8 x 16 / 8 x 30 / 12 x 30 / 12 x 40 / 30 x 60 / 30 x 80 / 40 x 80
PSD +	5% max
PSD -	5% max
CTC	50 / 55 / 60
Iodine	1000 / 1050 / 1100
Ash	3% max
Moisture	15% max
pH	6 - 8
Hardness	98
Silver content	0.01%min
Packaging	550kg jumbo sacks / 25kg PP bags
